VOLUME CONTENTS

1986 NUMBER 1

V. A. Venikov and V. K. Sokolov	1	Power system information theory problems
B. Z. Gamm and V. F. Tonyshev	9	Detection of generator out-of-step conditions from the impedance measured at its terminals
O. D. Goldberg	24	The scientific principles of induction motor diagnostics and quality control
V. P. Anan'ev and V. Ya. Frolov	30	Control of series-parallel groups of thyristors for switchgear
I. A. Glebov	42	The present state and problems in electric machine design for heat and power engineering
A. M. Bryantsev	49	The magnetized ferromagnetic apparatus with parts of the magnetic system fully saturated
V. A. Bogdanov and D. G. Gorelik	57	A measuring package for monitoring and control of power consumption
G. A. Shcherbakova, V. S. Kindyakov and V. M. Mustafin	65	The electric strength of air spacings between EHV distribution gear conductors
N. S. Voiteko, E. I. Gurevich and T. N. Kartashova	71	Detection of latent thermal defects in turbogenerator active parts
G. A. Tul'chinskaya	84	Improving the stabilizing properties of automatic voltage regulation in complex power systems
V. V. Bachurin, V. P. D'yakonov, A. B. Levin and V. Yu. Smerdov	88	Chopper-type high-voltage power MDS-transistors for transformerless supply sources
B. K. Nikitin	95	Algorithmization of continuous production process line control systems
	106	Abstracts of papers not translated from *Elektrichestvo*, Nos. 1–3, 1986

1986 NUMBER 2

G. I. Denisenko, P. F. Vas'ko, A. A. Bryl' and P. P. Pekur	1	The operating conditions of wind-driven d.c. generator plant
O. P. Novozhilov	9	The capacitor and controlled switch nonlinear reactive elements
O. P. Muravlev	18	Electrical machine quality control theory and practice
V. B. Klepikov	27	On "friction" self-oscillations in electric drives

V. Ye. Manoilov	35	On guaranteed electric safety
V. I. Popov	40	The principles of electric machine hybrid windings
A. K. Mikhailov	55	The energy criteria of a system consisting of a charging-discharge converter and a capacitive store
S. F. Zhukov	66	The tests for integrated microcircuit relay protection and automatic apparatus
V. P. Vasil'ev, V. N. Kozlov, R. P. Stroganov, V. D. Yarmiichuk and K. H. Segura	78	Power interconnection extra-to-plan load optimum control problems formalization
F. G. Huseinov (dec.), N. Sh. Abdullaev and S. E. Efendiev	89	Recognition of power system groups of cophasal generators
G. N. Aleksandrov, B. B. Bochkovskii and G. V. Podporkin	100	Evaluation of the lightning performance of ultra-high-voltage transmission lines without ground return wires
T. G. Akhmatova, G. S. Kichaeva and P. I. Shkuropat	117	A high-speed switch for impulsive voltage and current generator facilities
	121	Abstracts of papers not translated from *Elektrichestvo*, Nos. 4–6, 1986

1986 NUMBER 3

V. V. Sarkisyan, R. S. Tsgoev and Yu. G. Shakaryan	1	Fault conditions and asynchronized electro-mechanical frequency-changer stability
A. V. Berezhnoi	19	The economic current density of low-cooled conductor cable
Yu. A. Bobkov	26	Calculation of the stator winding conductor inductive reactances for circulating currents
Yu. P. Sonin and Yu. I. Prusakov	37	The doubly-fed machine overload capability in operation as a valve motor
K. M. Vasil'ev and E. A. Meerovich	45	The transients in mixed-type electromagnetic systems
V. F. Samoseiko	51	An analysis of thyristor circuit self-oscillations
A. V. Ivanov-Smolenskii and V. A. Kuznetsov	58	Tooth-contour conduction determination of the slot inductive leakage reactance
O. Ya. Danilevich and B. A. Reshko	66	Calculating the electromagnetic field in turbo-generator end packets
A. G. Yurovskii	70	A hierarchical electric network model for active power optimization of the U.S.S.R. Power Pool
N. P. Yemel'yanov, M. M. Sitzer, V. A. Kostyushko and A. I. Tamazov	79	The corona power losses on 750 and 1150 kV transmission lines

V. A. Venikov and **Yu. M. Tyukhanov** 85 An application of similarity theory to electric supply system design

Yu. V. Tikhomirov and **O. K. Trunov** 93 The resistance of sheet metals to lightning thermal action

98 Abstracts of papers not translated from *Elektrichestvo*, Nos. 7–9, 1986

1986 NUMBER 4

CONTENTS

A. D. Muzychenko 1 The qualitative criteria of electric energy

I. V. Belousov and **S. B. Losev** 10 Open-conductor operation of a transmission with static compensators

V. M. Lupkin 20 On the steady-state stability of a superconducting turbogenerator

U. A. Oganyan and **V. I. Chitechyan** 27 Rotary transformer inductive parameters determination for synchronous generator brushless excitation

A. Kh. Kalyuzhnyi 37 Network power flow control by phase-shifting transformers

V. M. Mikhailov and **A. I. Orel** 49 About calculation of the current distribution in long non-magnetic conductors under transient conditions

M. E. Mamedshakhov, M. M. Nezhinskaya, N. S. Nikolaeva and **O. V. Tozoni** 60 The linear induction motor stator gap primary magnetic field

Yu. A. Bobkov 77 The resistance of stator winding transposed conductors to circulating currents

V. V. Dodotcheno and **A. G. Nikolaev** 86 Improvement of the energy characteristics of constant voltage impulse supply systems for impulse loads

N. S. Lidorenko and **G. F. Muchnik** 93 The chemical sources of power

V. I. Popov 104 The hybrid armature windings of synchronous machines with magnetic field third harmonic excitation

T. M. Nemeni 114 Numerical-analytic calculation of electric machine tooth zone magnetic fields

123 Abstracts of papers not translated from *Elektrichestvo*, Nos. 10–12, 1986
